**A. E. MICHAEL'S,**  
A GOOD PLACE TO TRADE.

### Calendar.

August.  
16—Mr Washburn's meeting in  
Ducholke's Hall.  
19—Women's Institute meets.  
20—Big shoot for prizes, Comst  
Butts. Bring your wife.  
20—Wabamun's ball team at  
Stony.  
22—Dance at Holbert Hall.  
24—F. B. S. A. meeting in Town  
Hall.

### Why Farmers Get Gray

In a recent issue the Calgary  
Albertan gave the story of raising  
a crop in tabloid form:

First, there was the late spring  
to think about.

And then there was the anxiety  
about the June rains.

And then came the alarm about  
the July drought.

Now there is the ever-present  
menace of hail!

And after that early frost.

Then will be the danger that  
the price of wheat will drop.

The life of a farmer in this  
country is never free from anxiety.

### On the Side.

Baseball having slackened off  
and the berry-picking season being  
over, the principal outdoor sport  
at present is "spearing" green  
beans on Main street for your favorite  
cemetery.

Whatever we may feel about  
prices rising, says the Leadbridge  
Herald, we cannot share the same  
apprehension when wheat is going  
up.

Premier Greenfield says that all  
the daily papers in the province  
are against his Government. We  
would not say so, says the Ver-  
million Standard, but why worry  
when there's only a handful of  
cutaway?

Johnny says there is no more  
room for cranks in 1924. All we  
want is a few more self-starters.

Henry Wise Wood said that in  
1919 everybody was prosperous.  
Quite so, in 1919 we were walking  
in the clouds, but now we're clut-  
ping in the cash.

We now have in our midst a  
disrupt of the "American Society  
of Therapies, with branches in  
Toronto and in Ontario." A study  
of this society's tendency to foot  
comfort and tells you the best  
place to have corns. If you don't  
think so, ask Mr. Worringer, who has  
taken up the study.

### Change in Liquor Act.

A change has been made in  
the Liquor Control Act whereby  
"a Government vendor may  
deliver liquor to an agent of a  
holder of a subsisting per-  
mit, authorising the purchase  
of liquor, provided such agent  
produces to the vendor such  
permit and written authority  
to receive such liquor, such  
authority to be signed by the  
permit holder and to set out  
in detail the kinds and quanti-  
ties of liquor required, and  
such agent may lawfully con-  
vey such liquor to such permit  
holder and deliver same at his  
residence but not else-  
where.

By another clause permis-  
sion is given a common car-  
rier or its agent to carry and  
deliver the liquor to the per-  
son to whom it is consigned.

### Stockyard Items.

In spite of the poor roads  
on Thursday, hogs came in  
pretty freely. One car was  
shipped West, and one went  
to Edmonton.

Competition was still keen  
last hog day, with farmers  
asking Edmonton prices. They  
seem to be getting the habit.  
The prediction is made hogs  
will go to 13c this fall, owing  
to the rise in the price of all  
grain.

Quite a number of lambs  
are being shipped from Stony  
at present.

"Tommy, King of Clubs"  
is taking a long vacation this  
summer.

### The Press Kept at Bay.

There is always something  
mysterious about high finance.  
It is the only all-important  
human activity that guards  
its secrets from the newspa-  
pers (whose representatives  
penetrate at will the sanctuaries  
of politicians and even the  
boudoir) but are kept at bay  
by the banks. Hon. Bertrand  
Russell.

Shoppers are reminded  
the Wednesday half-holi-  
day is now in operation in  
Stony Plain and contin-  
ues through the month of  
August.

### LOCAL NEWS.

Mrs. (Dr.) Walton leaves  
today on a visit with her  
parents in Toronto.

Joe Trett, Turtleford, was  
in Stony over the week-end.  
While here last week Mr  
Jack Shearer sold his house  
on Third street to Mr J W  
Myers.

There is quite a competi-  
tion on for the vacant janitor-  
ship at the local school.

Meridian Lodge held its  
regular monthly session on  
Tuesday evening.

Grade VIII exam results  
will be given out by the Dept.  
of Education the latter part  
of this week.

Lutheran services were con-  
ducted in the Town Hall on  
Sunday last by Rev E Elber-  
hardt.

Bus driver V Kellough has  
moved his family out from  
Edmonton, and have taken  
the Rossell house.

Kelly's General Store has  
had electric lights installed,  
with an electric projection  
over the sidewalk, at the front  
door.

Oppertshauser's got in a  
car of blader twine last week,  
the good Plymouth brand.  
There will be a bigger demand  
for this article in this district  
than what was thought sev-  
eral weeks ago.

Trouble in the mountains  
is disarranging the regular  
running schedules of passen-  
ger trains on the Canadian  
National Ry. Saturday's train  
from Vancouver was over 3  
hours late.

Mr J D McDonald is look-  
ing after the troubles on the  
Government phone line in this  
district while the genial Bill  
Ingles is in Calgary on his  
vacation.

About 20 were present at  
the shoot at the Rifle Range  
on the 6th. In the contest for  
the prizes Geo. Graden won  
first, J Smith second, S C  
Ellip third, Mard McKinlay  
4th. In the sweepstake shoot  
which followed Geo Graden  
was again successful in win-  
ning the money.

Joe Goodwin, a city youth  
employed on a farm of J H  
Coates, on Monday decided  
to take a vacation, so tying  
three of the 4-horse team he  
had been working to a tree,  
he mounted the fourth and  
rode to Dufield, where he re-  
plenished his wardrobe, and  
hit the trail for Edmonton.  
When passing thru Blueberry  
he was nabbed by Officer  
Smith, who took him to Stony  
for a hearing.

## Home Training And Respect For Law

There is widespread discussion at the present time as to the cause of the crime wave sweeping the continent, so much in Canada, as in the United States, although this Dominion is also affected. As a matter of fact, Canada can never wholly escape influences emanating from the United States, whether they be good or bad, and if conditions, customs, laxity in law enforcement, or any other circumstance leads to the development of criminal instincts and acts in the United States, this Dominion is sure to suffer therefrom to some extent. Canadians are, therefore, vitally interested in the trend of events across the line.

Chicago, for example, has a record of a murder a day for the first six months of this year, a fact to which the appalling crime of which the two youths, Loeb and Leopold, stand confessed, has directed more than passing attention. Everywhere the question is being asked: What is the cause of this crime wave?

There are undoubtedly more causes than one, and consequently many answers are given. Some blame it on the war and to the fact that for four years human life and property were the cheapest commodities in the world, and millions of men became almost indifferent to the shedding of human blood. But any such answer is palpably insufficient.

Others declare the underlying cause is disrespect for Law, and many who advance this reason point to the utter contempt and open defiance of the Prohibition laws by thousands of otherwise good citizens as the chief reason for prevailing disrespect of all law. But it is open to question whether individuals have less respect for prohibitory law than they have for our strict Sunday observance laws, or Customs laws. It is unfortunately true that few people are inclined to resist the temptation to smuggle something if the opportunity presents itself.

Nevertheless it is no doubt true that disrespect for Law has a great deal to do with the crime wave. But the underlying cause is deeper than that. It must be first discovered what has resulted in this disrespect for Law. There is, of course, the propaganda of the I.W.O.'s, the Bolsheviks, the Red Communists, who would defy all law and destroy the existing order of Society. But the real cause is to be found nearer home.

Disrespect for Law is being encouraged and developed among the boys and girls of today through the laxity of parents in enforcing proper respect and obedience at home, through their failure to instruct their children to respect and respect the rights of other people and other people's property; by their neglect to train children to be above all things honest, truthful and honorable; because, in fact, parents themselves are guilty of deceit in their dealings with children, and fail to inculcate ideals of honor and Golden Rule principles in the lives of the rising generation. Too many parents today leave such training to the Church and the school, but these can never replace the home, and home training, the best they can do is to further develop and strengthen right ideals in thought and living.

Children are brought up on fables. First, there is the Santa Claus fable. Instead of early teaching, that the giving of gifts at Christmas time is synonymous with the giving of God's greatest gift to mankind. Thus the opportunity to teach unselfish thought, and action for others is lost, and the great lesson that it is more blessed to give than to receive neglected.

Then, arising out of a false conception of life, comes the deceit where parents explain the appearance of a new baby to the older children as a gift from a stock, whereas the opportunity of reverently instructing the older boys and girls in the true meaning of love and the mysteries of life should be embraced. As they grow older children remember such hypocrisy and come to the conclusion that if it was right for father and mother to deceive them, it cannot be otherwise than right to practice deceptions themselves. When truth is thrown into the discard the chief foundation stone of Respect for Law is undermined.

In the evidence brought out in the trial of Loeb and Leopold, to establish that they were not normal mentally, there have been some amazing disclosures of mistakes made in their early training, clearly establishing that bad wiser measures been taken their whole future would have been radically different.

It is in the matter of home training that a revolution for the better must be worked if the basic cause of crime is to be removed. If children lose respect for parents and teachers, it is an easy step to lose respect for law, and then lawlessness follows as an inevitable result.

**Blind Girl Receives M.A. Degree**  
Miss K. L. Wood-leigh, 21, a totally blind girl, received her M.A. degree from McGill University this year. She graduated from high school at 16, and took highest honors in history while attending the university. She will continue her studies at Oxford.

### And the Sticks Get Burned

"Your school is not a seminary; it's a match factory," said the smart young college man to the girl student.

"You're right," said the girl. "We furnish the heads and get the sticks from the men's colleges."

**The Terror of Asthma comes like a thief in the night**, with its dreadful thrills, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of this remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living again. If the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

Three Pillan chiefs were received by the King at Buckingham Palace and presented him with a set of whales' teeth.

No one ever has discovered the secret of perpetual motion, although, scientifically, nothing in existence is ever still.

A Florida man recently announced his desire to bequeath his skin to his friends for the purpose of book-binding.

Minard's Liniment Relieves Pain

## Alberta Straw Industry

Will Manufacture Paper From Surplus Quantities Of Straw

Howard Stutchbury, Provincial Trade Commissioner, is expecting an early and favorable report from the Government Laboratories at Ottawa, regarding the samples of paper manufactured from Alberta cereal straw, which were forwarded a few weeks ago.

Alberta straw has proved to be a highly economical and satisfactory substitute for wood pulp in the manufacture of paper, and as soon as a report is received from the east, it is anticipated that the product will be placed on the market.

Several capitalists here, it is said, are prepared to finance the new manufacture, which should eventually utilize the vast surplus quantities of straw in the province, and also release large tracts of timber from the certainty of destruction.—Edmonton Bulletin.

## On the Marriage Day

Romance usually ceases and history begins, and sore comes begins to go when "Putnam's" is applied. It takes out corns, roots, branches, stems—no trace of a stubble left after Putnam's Painless Corn Extractor has done its work. 25c at all dealers. Refuse a substitute.

## Products of the Forest

There are upwards of 100,000 people in Canada actively engaged in converting the products of the forests into wealth in some form or other, and with the families they represent this means that half a million people in the Dominion are dependent on the forests for their living.

## GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, dysentery, and diarrhea, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Protection For Autos

Placed at the top of curves and cliffs and at approaches to bridges, a close-woven wire fence, painted white has proved to be a far better protection against automobile accidents than stone walls or wooden rails have been. Such a fence has both strength and resiliency. An automobile cannot break through it, and at the same time a car that hits it neither is injured itself nor injures the fence.

## Winter Race Track

Race track interests of the United States and Western Canada are quietly investigating the possibility of building a winter track on an island near Vancouver, and holding races throughout the winter, together with large training quarters for the racing stock of the North American tracks.

**For Scalds or Burns**—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the home and stable saves many a doctor's and veterinary's fee.

## Copper Production

Copper production in Canada in 1923 amounted to 86,881,537 pounds, valued at \$12,579,186, as against 42,579,815 pounds, worth \$5,735,177, according to a report of the Bureau of Statistics. Production was confined to the province of Ontario and British Columbia, which produced 31,654,800 pounds, worth \$4,666,221 and 55,226,737 pounds, valued at \$7,968,959 respectively.

Red-haired people have notoriously fewer hairs in their head, but they have the consolation that they seldom develop baldness. Red-haired heads have about 20,000 hairs; fair-haired heads about 150,000 to 160,000; and dark-haired, about 105,000.

Minard's Liniment Heals Cuts

# HARRY GRANFIELD GIVES TANLAC FULL CREDIT

"My health has undergone such a wonderful improvement that I must say Tanlac is an unusual medicine and tonic," states Harry Granfield, 153 Havelock St., Toronto, Ont.

"For two years past I have been troubled with indigestion to such an extent that I felt unfit for anything. My nerves became all undone and my sleep was untroubled. My energy had about all left me and I would tire out easily."

"Since taking Tanlac I have a wonderful appetite and my stomach never

troubles me any more. My sleep is sound and restful and I get up mornings with renewed energy and really feel like active work for the first time in two years. I am strong for Tanlac."

"Tanlac is for sale by all good druggists. Accept no substitute. Over 40 Million bottles sold."

Tanlac Vegetable Pills for constipation, made and recommended by the manufacturers of TANLAC.

## Northern Ontario Gold

Production of gold from the mines of Northern Ontario for the first six months of the current year reached an aggregate of \$11,750,000, according to preliminary estimates. The income from investments, bonds and bank deposits, and from premium on gold sold for New York funds, brought the total income of the gold mines to well above \$12,000,000 for the half year.

## Don't Let the Hot Kitchen Spoil Your Summer

## Save Fuel in Cooking

The illustration shows an interesting test you should try in your own kitchen. It proves the superiority of good enameled ware for cooking purposes. Take an SMP Enameled Ware Sauce Pan, and a sauce pan of equal size made of aluminum, tin or other metal. Into each pour a quart of cold water. Set both sauce pans over the fire. The water in the SMP Enameled Ware Sauce Pan will be boiling merrily in about five minutes, while the water in the all-metal sauce pan will come to the boil in about eight minutes—three minutes longer. Save fuel in cooking. Use

## SMP Enameled WARE

## Estimate Of Germany's Wealth Is Made After Careful Study By American Financial Experts

According to a study just completed by the Research Department of the Bankers Trust Company of New York, the wealth of Germany today is \$55,000,000,000. This figure is arrived at after making allowance for the territorial losses imposed by the Versailles Treaty, the fact being kept in mind that, while some of this territory was agricultural, and not highly productive, yet the loss of Alsace-Lorraine carried with it very large resources of iron and potash, as well as industrial works of considerable magnitude, while the occupation of the Saar basin has also deprived Germany of extensive coal deposits. The fact also was taken into consideration that in being part of Silesia, Germany lost many industrial plants and large iron and zinc deposits, and 42½ per cent. of all the German coal lying within five hundred yards of the surface. Allowance was made also for the depreciation in buildings and in the decreased productivity of agricultural lands.

The accepted pre-war German estimate, that of Dr. Karl Helfferich, was 216 billion gold marks (\$73,750,000,000). Sir Joseph C. Stump, the well-known English statistician and economist, in an estimate made in 1919, raised this figure to \$80,500,000,000 to make allowance for several items which he felt Dr. Helfferich had overlooked.

Dr. Helfferich, just before his death, in a special series of articles on Germany's finances contributed to the London Standard, estimated the present-day wealth of Germany, some what lower. Taking as a basis figure 200 billion gold marks, or say, \$17,000,000,000, he reduced this amount by making allowance for diminished productivity of the intrinsic value of Germany's railways and on this account he made a reduction of \$5 billion gold marks, or \$11,900,000,000, concluding that the present value of the German national wealth would amount to 150 billion gold marks, or about \$55,000,000,000.

In view of the facts regarding Germany's industrial plants and the excellent condition of her railroads, as given in the Dawes report, the Research Department of the Bankers Trust Company is of the opinion that this last reduction of \$5 billion gold marks made by Dr. Helfferich is not quite fair, and therefore that the actual wealth of Germany today lies somewhere between his basic figure of \$47,500,000,000 and the estimate independently made by the Trust Company of \$55,000,000,000.

### Rate Of Seeding Sweet Clover

Light Seeding Appears To Do As Well

An Heavier Sowing Rate  
Four plots of sweet clover were sown at the Brandon, Man., Experimental Farm, without a nurse crop, in the springs of 1922 and 1923, at four different rates, respectively, 6, 9, 12 and 15 lb. per acre. The Superintendent of the Farm, Mr. W. C. McKillop, states in his report for 1923, that an equally good stand was obtained from the lightest seeding as from the heaviest, while the total yield was very similar. There was no significant difference in the quality of the hay as a result of the different rates of seeding. Mr. McKillop also states, but he adds, that the crop as a whole was somewhat coarser compared with the crop from plots that had been seeded down with a nurse crop. The standard rate of seeding sweet clover on the Brandon Farm is 10 pounds per acre of scarified seed when a nurse crop is used and 8 pounds when sown alone. These rates appear to be sufficiently heavy, the superintendent remarks, and larger quantities are not recommended unless the seed bed is in poor shape.

Japanese Women Coming To Canada  
From April 1, 1918, to May 31, 1924, a total of 2,869 Japanese women entered Canada as settlers. During the same period, 429 male Japanese laborers and 1,545 male Japanese, other than laborers, were admitted. Available records of Japanese departing from ships in Canadian ports, dating from April 1, 1920, show that 90 settlers and others probably entered Canada illegally.

W. N. U. 1237

## A Powerful Argument

If Canada Grows To Thirty Million Hudson Bay Route Is Needed

"Our statisticians," says Investment, the House organ of Noëll, Thibault and Company, Limited, "has figured out that by 1950 at the present rate of increase, the population of the United States will be 500,000,000 and that of Canada 30,000,000." This is put forward as a powerful argument in favor of the St. Lawrence project from the hydro-electric development standpoint. "If there is a power hunger now what will be the development in ten years from now, and what will be the need twenty years from now?" Quite true! With thirty million people in Canada twenty-six years from now, there will be use for hydro-electric development; but the strange thing is that all Eastern Canada can see great things grouped around Toronto and Montreal; they can picture the millions of the great west as customers of the hydro-electric industries along the St. Lawrence; but they refuse to see the need for cheap transportation for our wheat and cattle to the world markets via the Hudson Bay Route. So far as the east is concerned it is millions for the St. Lawrence not a dollar (not even of our own money—cheap fuel sales), for the development of the Hudson Bay. But thirty millions for Canada and five hundred millions for the United States is just as powerful an argument for the development of the Hudson Bay as it is for the St. Lawrence project—Moose Jaw Times.

## Dates For 1925 Fairs

Western Fair Circuit Decides on Plans

At a meeting of officials of the Western Fair Circuit held in Regina, the following dates were arranged for next year's fairs: Brandon June 29 to July 4; Calgary July 6 to 11; Edmonton July 13 to 18; Saskatoon, July 20 to 25; Regina, July 27 to Aug. 1. It was decided that Saskatoon and Regina fairs would assume the expense of the construction of the dynamometer that has proved such a popular attraction this year. Edmonton and Calgary will pool the expenses of transportation and this will be made a permanent policy.

It was generally agreed that the present system of choosing platform attractions at the time of the annual meeting was not suitable and suggestions will be laid before the various fair boards were made for selecting the attractions later in the year.

## Refute Misleading Stories Of Canada's Climate Which Tend To Retard Immigration

### Egg-Laying Contest Results

Average Yield of Eggs Increasing With Each Successing Contest

Six thousand, six hundred and eighty hens competed in the egg-laying contests conducted by the Dominion Experimental Farms in the first three years of operation. These contests include the Canadian contest for the whole of Canada, carried on at Ottawa, and provincial contests conducted at an experimental farm or station in each of the provinces.

The number of birds entered as well as the average yield per hen, increased with each succeeding contest. The first year, 1,610 birds gave an average of 112.6; the second year, 2,480 yielded an average of 134.5; and for the third year, namely, 1921-22, 2,500 birds yielded an average of 116.3 eggs per bird. The average cost of the eggs produced was approximately 25 cents per dozen for the three years.

These contests are associated with the Record of Performance for poultry, which grants registration to birds that lay, in twelve months, 200 or more eggs weighing at least twenty-four ounces to the dozen. Males are also eligible for registration if they are the sons or grandsons of registered females and otherwise meet official requirements. According to the report on the contests, which is issued as Bulletin No. 38 of the Department of Agriculture at Ottawa, 23 per cent. of the hens taking part qualified for registration in 1920, 36.4 per cent. in 1921, 40.3 in 1922. In the latter year, 402 birds qualified, and of this number, 269 are reported to have been registered in the Ottawa Nine breeds were represented, the leaders being Barred Rocks, Single Comb Leghorns, White Wyandottes and Single Comb Anconas.

The view of a parish in the west of England fell ill one Saturday afternoon and a certain famous canon who happened to be staying in the neighborhood consented to conduct the service on the Sunday.

At the close of evening service, the churchwardens assembled in the vestry to thank him.

"It's very kind of you, we're sure," said one of them. "A much worse man than you would have done for us, but we couldn't find one."

Canadian delegates attending the first congress of the Empire Commercial Travellers' Association in London, came mainly to the defence of Canada's climate the other day. It appears that some newspaper reports published in Great Britain had spoken of the severity of our winter, of our roads made impassable by snow and our motorists obliged to equip their cars with sleighs "in order to travel on the highways." To correct false impressions which might be created by these tales, the Canadian commercial travellers told of their experiences of winter motoring and of the clothing they were wearing during the winter months.

Canada has to admit having a winter but does not like the title, "Our Lady of the Snows," conferred upon the country by Mr. Kipling to be interpreted too literally. Mr. E. W. Beatty, President of the Canadian Pacific Railway Company, recently told the Association of Advertising Clubs of the World at its meeting in England, that Canada's winter should be counted as one of its assets. "Without that winter," he said, "we should not be able to grow the hard wheat on which so much of the prosperity of the Canadian west depends and which every miller in the United States desires for his choicest flour. Without that winter we should not have the fur-bearing animals and furs for trade which for three hundred years has been one of Canada's basic industries. Without that winter we could not haul so economically as we do the products of our lumber and pulp mills. And, last but not least, without that winter, we could not have the virile, sturdy manhood which the whole world, particularly since the achievements of the Canadian army in the Great War, has come to identify with the Canadian name."

Yes, we must admit that we have a winter, but we object to dissemination of the idea that all Canada is an Arctic waste, covered for six months of the year by a forbidding snow and that its inhabitants are forced to clothe themselves like Eskimos, and remain huddled in the igloos for shelter from the cold from November until April. Fortunately, such an idea could scarcely be widely entertained in Great Britain. So many people from the British Isles visit the Dominion during the winter months and so many have found homes here that it is hard to believe any description could be credited. Surely, it must be understood that climatic conditions vary in different parts of a country as vast as this, that in some parts of Canada the winter does not differ greatly from that of Great Britain and that, even where the clear, cold weather makes it necessary to heat houses properly and to wear warm clothing, but is healthy and permits indulgence in outdoor sports to enjoy which English people so it Swiss winter resorts.

People contemplating migration from Britain to Canada should be acquainted with the general character of the climate of the section of the country in which they intend settling. They should not come to this country late in the autumn unprepared to face winter conditions. On the other hand, they should not be deterred from seeking homes in Canada by false notions about its climate, which is not unendurable and which has not prevented others from earning a good living and enjoying life in the Dominion—Mail and Empire.

### Unemployment Conference

Wednesday, September 3 is the date fixed for the general conference in Ottawa on unemployment, according to word received from Hon. James Mackenzie, Federal Minister of Labor. Expenses of delegates from provincial governments, cities and various organizations invited to the conference will be paid by the Federal Government.

### One To Jump At

Miss Youmans, you've known him only a month. Don't you think you are taking a great many chances in marrying him?

Miss Olden (candidly).—Dear no, no. It's the only chance I've had in twenty years.

London has 135 different omnibus routes and 615 railway stations.

## WORLD'S ODDEST WATERWORKS BUILT BY INDIAN

Waterworks are not alone the possession of great cities and towns. In the dry belt region of British Columbia an Indian has built the oddest waterworks system in the world. And it serves, even more purposeful than those of great cities.

Behind the Indian's home a short distance, a small creek came down through a low range of hills. On the hillside at a higher level than his house, as he was to have gravity to aid him, the Indian built an aqueduct. The risk down from a cedar stump five feet high stood near his house.

He hollowed the cedar stump to form a reservoir into which the aqueduct emptied. From the cedar stump three pipes ran. The one at the top emptied into a small trough. The water being from a mountain stream was fairly hot in this dry region. The largest receptacles were placed holding whatever foods were affected by hot weather. Thus the trough made an excellent refrigerator. In the hottest weather in this region milk and butter were kept here. The largest pipe, about half-way down the stump, carried water to the house to supply the needs of cooking, washing and sanitation. The lower one, receiving

the greatest amount of pressure, was attached to a hose pipe, which ran and irrigated a large garden, making possible the growing of many things that otherwise could not be raised in this dry region. Cattle can also be watered at the trough. The inventor and every phase of the system are shown here. The height of the cedar stump can be gained nearly by comparing with the woman who is five feet six inches tall. The aqueduct can be shut off by working a lever which is seen in the hands of the Indians seated before the watering trough, which serves as a refrigerator. Francis Dickie.

## ARE WILLING TO CONSIDER PLANS FOR H. B. ROAD

Ottawa.—Hon. George Graham, Minister of Railways, indicated his willingness to discuss "any reasonable proposition" for the taking over of the Hudson's Bay Railway.

"Informally, a proposition of the kind has been put before some of the ministers, but Mr. Graham stated that he had not considered it to be very definite. He thinks the case is one in which the western provinces should have a vital say."

"If they come forward with, or in support of, a scheme for taking over and completing the line, the Government will be glad to negotiate about it with them," said the Minister of Railways.

In the recent discussion in the House, when a motion of censure on the Government was moved for not completing the line, hostility to the scheme as an "ocean" route was indicated plainly. As a colonization line it was more favored, but it was evident that missionary work will be needed on all sides, including the Progressives before there is parliamentary endorsement of it. A new prospect is opened up in the possibility of private or provincial interests acquiring and completing the line.

## Would Stop Abuse Of Word "British"

Bill Dealing With Company Organization Introduced in House

London.—A bill providing that where limited liability companies use the word "British" as part of their trading name, all the directors shall be British, and that 51 per cent. of the shareholders shall be British born or British by naturalization, was introduced in the House of Commons by Sir J. R. Remer, Conservative, and given first reading.

Mr. Remer said there were public companies that, ostensibly, were British, but were simply cloaking their foreign nationality under the title. He cited the case of a recently registered concern with three directors, one of whom was an unnaturalized Russian, who had eight-eighths of the share capital, another a naturalized British subject born in Lithuania, and the third a naturalized citizen of the United States born in Russia. This company dealt in aeroplanes.

## Determined To End Revolutionary Menace

Governor Of Bengal Issues Warning Of Drastic Action

Calcutta.—The British authorities use every means in their power to defeat the revolutionary menace in Bengal, the Earl of Lytton, Governor of Bengal, declared in an address at Dacca.

The Governor said there was an exceptionally difficult and anxious time ahead, adding: "We are quite strong enough to deal with the revolutionary menace and we shall not shrink from using, fearlessly and unhesitatingly, all the weapons necessary for its defeat."

## Bad Floods In India

Estimated Deaths Are 100 and 50,000 Persons Homeless

Madras, British India.—The floods in Southern India which, according to previous despatches, submerged half the state of Cochin, caused at least 100 deaths at Malabar, according to official reports. The loss of life elsewhere was comparatively small.

It is estimated that 50,000 persons are homeless while thousands of acres of crops have been ruined.

There has also been a severe outbreak of cholera in the province of Madras and subsistence relief is urgently needed. Money for the purchase of seed, cattle and building material is badly needed also.

Toronto.—"Action is to be taken immediately against those who have neglected or refused to pay their double liability in connection with the Home Bank, or who have not put in a defence against their liability," said G. T. Clarkson, liquidator of the Home Bank.

W. N. U. 1537

## Grading Of Bacon Necessary To Capture British Market

Toronto.—The Ontario farmer is better off than his brother across the Atlantic, but he must produce goods of first-class quality in order to capture the English market, said Hon. J. S. Martin, Minister of Agriculture in Ontario, on his return from a tour of Britain and the continent. "Grading of bacon is essential if Canada is to compete in the Mother Country with Denmark," said Mr. Martin. "Agricultural workers will be available from Scotland and Ireland, but not many from England. Scandinavia and Holland, however, may send a good quota to Ontario."

## British Squadron Welcomed

Nova Scotia and Halifax City at Home To Visiting Taps

Halifax.—Nova Scotia and Halifax City extended official welcomes to Vice-Admiral Sir F. L. Field and the British special service squadron in the historic council chamber of the provincial building here.

Admiral Field, in replying to the address, happily set forth three reasons for the visit of the fleet: namely: To test the latest type of ships under all conditions of climate; to give to the personnel of the fleet the opportunity of seeing the great trade routes of the Empire and to give to the people of the Dominions the knowledge that, despite the difficulties consequent upon the great war, Great Britain was still keeping up her navy as far as possible.

The address, presented by the province and the city spoke of the close and happy relationship that had always existed between Halifax and the British navy, the port having been the headquarters of the North Atlantic fleet of the British navy from 1749 until the "period when requirements of strategy demanded concentration of naval strength in the North Sea."

## Want Self-Government

Religious Intolerance Stands In The Way Of India's Advancement

Toronto.—India's trouble is not political, it is religious. The bitter and fanatical intolerance of the Mohammedans is the evil force which precludes a working agreement with the Hindu-minded Hindus and obstructs the way to realization of national aspirations, according to Professor C. V. Raman, who holds the chair of physics in the University of Calcutta, India, and who is one of the most picturesque and most interesting visitors to the annual meeting of the British Association for the Advancement of Science.

"The great desire of the people of India is to obtain self-government," Professor Raman said, "and really they are not antagonistic to Britain. They wish to co-operate with Britain and to remain allies of Britain, but just not their great aim is to receive the same full nature of self-government as has been extended to Canada, Australia, New Zealand and the Irish Free State."

## Duke Of York Not Coming To Canada

Is Sailing In November For British East Africa

London.—The Duke and Duchess of York will sail for British East Africa in November, it is announced. Their tour will include Kenya Colony and Uganda and will take three months. The Duke's suggestions will likely include much big game hunting.

It was learned by the Canadian Press that there is absolutely no foundation for the suggestion that the Duke of York will visit Canada with the Prince of Wales.

Killed By Outlaws

Mexico City.—Seventeen defenceless persons were killed and ten others wounded when a band of fifty armed outlaws attacked a busload of American tourists at Oaxaca, state of Yucatan, according to a special dispatch from Merida to El Universal.

Killed On Track

Niagara Falls, Ont.—Playing a month organ and apparently not having an approaching train, John Seher, 45, was instantly killed on a railway siding here.

## Gives Valuable Aid

AMBASSADOR KELLOGG

chief American plenipotentiary at the Inter-Allied Conference in London, who bent all his efforts towards healing the breach between the French delegates and Anglo-American financiers.

## No Pension Claims After This Month

War Veterans Must File Disability Claims Before Aug. 31st

Ottawa.—Canadian ex-service men are reminded in a bulletin issued by the Dominion Command of the Great War Veterans' Association that all claims for disability pensions will be cut off after August 31, 1924.

The bulletin states that "every ex-service man who suffers from any disability, which he believed to be related to his war service, should file his claim immediately. Such action may not lead to an early adjustment in his favor, but he will secure the basis of full consideration ultimately, and protect himself in respect to any development of the disability."

This warning also applies to dependents' claims, except that application may be made within three years after death, or the date on which the applicant became dependent. The notification states further that "during recent years many disabled veterans have abandoned all hope of pension following the receipt of a communication from the Pensions Commissioners that the disability was not attributable to war service. These men are advised to again test their rights to pension."

## Capture Assassins

Parties Guilty of Killing Mrs. Evans Are Taken By Mexican Authorities

Mexico City.—The assassins of Mrs. Rosalind Evans have been captured, according to a report given out at the war department. The report came from General Roberto Cruz, military commander in the State of Puebla, where Mrs. Evans was shot and instantly killed.

The guilty men have been brought to the city of Puebla, adequately guarded, the message from General Cruz said. Members of the Mexico City secret service and the secretary of the British legation, accompanied the military authorities who made the arrests.

## Appointed Manager Of Saskatchewan Wheat Pool

Regina.—Donald MacRae, of Regina, has been appointed general manager of the Saskatchewan wheat pool. Mr. MacRae is well known to the farming community throughout the province, his work with the Saskatchewan Co-operative Elevator Company, Limited bringing him into close contact with grain growers. Mr. MacRae was acting chief superintendent of country elevators for the company in 1920, following the resignation of Mr. Thordarson, and in 1921 he received the appointment of chief superintendent.

## Britain Receiving Dyes From Germany

During 1923-24 Value At Par Was \$944,200

New York.—During the British financial year 1923-24, the British Government received, in payment of reparations, dyes from Germany valued, at par of exchange, at \$944,200. The gross amount received for the sale of dye stuffs, which included an accumulation from previous years, amounted to \$1,572,250, while the total amount of commission and all other charges incurred in disposing of the dyes, including freight from Germany and storage, was \$1,626,450.

According to advices received by the Bankers' Trust Company of New York from its English information service, the value of the total amount of dyes received from Germany since these shipments commenced in 1920, was \$5,501,900. The total amount received from sales was \$4,571,000. The total amount of commissions and all other charges incurred in disposing of these dyes amounted to \$1,626,450, or 15.21 per cent. of the sales.

## Branch Line Construction

Active Work Has Commenced On C.N.R. Extension Work

Windsor.—Work has started on the Canadian National Railway, Ravello, extension, to which royal assent was given about three weeks ago, according to announcement by officials of the company.

Steel is now being laid on the 11 miles of road, which was graded some time ago. On completion of this section operations will be extended to other authorized branch lines of the company within the province.

In addition to these lines, five others will be constructed in the other western provinces—three in Saskatchewan and one each in Alberta and British Columbia. The branch lines will cover a distance of 162 miles, and tend for the clearing, grading and installation of culverts are now in the hands of the chief engineer. No contracts, however, have been awarded.

Air Pilot Killed In Crash

Cleveland.—Harold A. Kullberg, 28, one of the best-known airplane pilots in the country, and who, during the war as a lieutenant of the Royal Air Force, bagged 14 German planes, and Henry Dunker, 34, of Hudson, Ohio, were killed when a commercial airplane in which they were flying went into a nose dive and fell 2,000 feet near Hudson, Ohio.

## LADY BYNG COMES HOME

The Lord Mayor and Lady Mayoresa of Liverpool, bidding good-bye to Lady Byng, wife of the Governor-General of Canada, when she left for the Dominion on board the Canadian Pacific liner Montclare.

## JAIL SENTENCES FOR SMUGGLERS IS ADVOCATED

Ottawa.—Jail sentences for professional smugglers were advocated by a deputation representing textile and other industries of Canada which waited upon Premier Mackenzie King and members of the Cabinet to emphasize the gravity of the situation resulting from the growth of smuggling of goods into this country. R. Percy Sparks, President of the Association of Garment Workers, acted as spokesman for the deputation, and stressed the enormous extent to which smuggling had grown.

The deputation advocated stern measures to deal with the professional smugglers and suggested that if such measures were adopted steps would be taken by interested organizations to form a bureau to co-operate with the Government in the arrest of such persons.

It was estimated that many of the big textile firms were being driven to the verge of bankruptcy and that the country was losing an annual revenue estimated at not less than \$10,000,000 through smuggling.

Following the conference, members of the deputation stated that they had received an excellent hearing and that the Government had promised that immediate attention would be given to the matter.

## Harvest Soon In Manitoba

Wheat Cutting Will Be General By August 24th

Windsor.—Wheat cutting will be general in Manitoba by August 23, according to the official crop report of the Manitoba Department of Agriculture. In a few isolated sections where frosts are particularly late, the wheat harvest will be delayed until about September 1, the report says. The report adds that the crops are maturing gradually, and that the filling out stage is well progressed.

General Swiss claims are characterized as "greatly exaggerated," and unless the rest develops faster from now on, "it should be only a small factor in connection with the earliest crop," the report states.

Damage from sawy and hail and frost is reported as "negligible."

## Swiss Planning To Climb Mount Everest

National Expedition Is Scheduled To Start Next Spring

Geneva.—Swiss clubs are preparing a national expedition which will attempt to ascend Mount Everest. The leader of the Swiss team, scheduled to start in the spring of 1925, is a well-known Swiss Alpine, who already has had experience in the Himalaya Mountains. His assistants will be some of Switzerland's best climbers, none over 35 years old.

The Swiss intend omitting the heavy oxygen apparatus carried by the British expedition, which attempted the climb. Instead, they will carry small bottles of compressed and liquid oxygen to be injected by syringe and needle into the arteries if overcome by breathing difficulties.

## No Harvesters From Britain

Transportation Companies Notified That None Will Be Needed

Ottawa.—There will be no harvester movement from the United Kingdom to Canada this year according to immigration authorities here. The Immigration Department regards it as inadvisable to permit a repetition of last year's influx of British men for work in the harvest fields of the west. Transportation companies have been notified of the Government's attitude in the matter. It is believed that there will be more Canadian farm labor available in the west this year than usual, and that whatever help is needed beyond that will be obtainable locally.

To Unearth Palace

London.—A sun-worshipers' palace will be completely unearthed in a region 150 miles south of Cairo next year by archaeologists of the Egyptian Exploration Society. It was announced at a meeting of the society here recently. The palace, as yet only half revealed, covers an area of 420 by 340 feet.

F. W. LUNDY,  
Stony Plain, Alberta,  
Solicitor for the Executors, Otto Oppertshausen and John Armbruster.

## Mounted Mountaineers Pow-Wow at Yoho

Above, Starting on the first Annual Ride. Below, Chief Walking-in-the-road picks out a few odd peaks for a fair Trail Rider.

Early last July a small party of riders was encamped on the plateau which lies between Tu nling Creek Glacier and the gap in the Vermilion Range of the Canadian Rockies known as the Wolverine Pass. The day was warm and conducive to sleep, and, because on this account one of the party dozed and dreamed and later caused the other members of the party to enquire about his dream, there gathered in the Yoho Valley of British Columbia a week since, two hundred and six prominent Canadians, Americans and Europeans, calling themselves Trail Riders of the Canadian Rockies. Each had qualified for membership in the Order by riding at one time or another not less than fifty miles through the Rockies on horseback.

This unique gathering, recording as it did the first attempt to form an association of mounted mountain climbers was characterized by Dr. Charles W. Walcott, head of the Smithsonian Institute of Washington and honorary president of the Trail Riders, as a step which will prove one of the greatest international attractions. The attendance at the First Annual Ride of the Trail Riders exceeded by far the most sanguine hopes of the organizers, but fortunately, Yoho Camp, that beautiful village of chalets a mile above the sea, had been reinforced with twenty Indian teepees and a huge Sag Dance Lodge which had been erected as camp headquarters by Stony Indians under the supervision of Chief Walking-in-the-road.

Only one trail rider left this camp with what could be termed a legitimate grouse. This was Dr. Walcott who believes that he stole the side of mutton which was hanging at the back of his chalet when he last saw it.

Riding was, of course, the order of the day, and many of the riders, enchanted by the scenery, fell far behind the main group and lingered on the heights till night fall. In the evenings the mountain enthusiasts gathered in the Sag Dance Lodge to talk over the day's ride and sing and dance and otherwise amuse themselves. After the white-manna pow-wow on the second night a real Indian pow-wow was danced by Chief Walking-in-the-road and Chief Buffalo-child Long Lance, to the accompaniment of Indian singing and the beating of tom-toms by a group of Stony braves.

Altogether the first annual pow-wow of the Trail Riders of the Canadian Rockies was a huge success, and the organizers believe that henceforth the Canadian Rockies will receive the recognition and appreciation which is their due.

## WHERE MIGHTY RIVERS ARE BORN

FROM the snow-capped peak of Mount Robson and other great mountains along the main line of the Canadian National Railways in Alberta and British Columbia, there is a constant trickle of water which, commencing as a small mountain torrent, grows until it reaches the dimensions of a mighty river on its way either to the ocean, to Hudson's Bay or to interior lakes. Fields of ice, stretching as far as the eye can see, provide the source of many streams which later become large enough to bear

the burdens of commerce from the interior to the ocean outlets to the world.

Mount Robson, which is seen from the trains of the Canadian National Railway, is 19,968 feet high, and the highest peak of the Canadian Rockies. This year the Alpine Club of Canada, numbering among its members the most eminent authorities on mountain lore, will hold its annual camp at the foot of this monarch of the Rockies, and numerous peaks surrounding the district will be climbed by the hardy lovers of outdoor life.

Canadian National trains stop at the foot of Mount Robson in order that travellers may see this massive peak, towering until it seems to pierce the very sky-line, and scarcely a tourist passes through who does not attempt to get one or more photographic mementoes of his or her trip.

Photograph No. 1 shows Mount Robson as it appears from the Canadian National Railways train; No. 2, the massive ice seracs which lie behind Mount Robson; No. 3, one of the mighty glaciers which feeds the ever-growing mountain streams.

Icelanders  
In Canada

Brief Sketch Showing How This Hardy Race Has Contributed Towards Development of the West  
(By Steina J. Stefansson-Sommerville, Dolis, Alta.)

Of all the non-British born peoples who make their homes in the Dominion of Canada perhaps none has contributed more to the opening up and development of the virgin land of the west than the Icelanders.

The first non-English-speaking settlers to reach Canada under British régime arrived as early as 1873. Subsequent years saw a great influx of these descendants of Norse-Vikings until, at the present time, their number is 30,000. They have remained on the land with the exception of perhaps 20 per cent who live in the larger centres of the west.

The trail to settlement has been blazed by these Icelandic settlers at 17 different points in Canada and so successfully that prosperity and general well-being rule in every case. There are no instances on record of an Icelandic having "sold up" his home and returned to his own country dissatisfied. They have all stayed and "made good." The only Government assistance given any of them as settlers was a small loan in the shape of stores, cooking utensils, and a few cows, made to the first arrivals, who reached the west shores of Lake Winnipeg in 1876.

The Icelanders are a steady, industrious, law-abiding people, well educated in the sciences and with high standards of living. None have ever made more easy assimilation. Born pioneers and inured to the hardships attendant on a hostile climate, they took hold in Canada and prospered, plucking a living somewhere from the forests, fields and waters of what was then wilderness. They had little to sell those first years and nowhere to sell it. All their business had to be transacted through an interpreter.

The first Icelandic settlement in Canada was founded in 1872 at Muskoka, Ont. (near Rosseau), and a remnant is still extant in the district. The heavily timbered lands have been cleared and cultivated and prosperity reigns.

In 1875, Gimli, "The Mother of Icelandic Settlements," in Western Canada, was founded. The settlers accomplished the tedious journey from Ontario to St. Paul by ox cart across the Canadian wilderness. From St. Paul they travelled by water, floating down the Red River past the trading post of Fort Garry (now the City of Winnipeg) and on into Lake Winnipeg in flat-bottomed houseboats.

A talk was made in the face of winter at a point 10 miles north of what is now Winnipeg Beach, one of Western Canada's most famous summer resorts. Log cabins sprung up overnight with moss and clay in the cracks, and rude homemade benches, beds, and tables.

The travellers moved in and proceeded to forage in forest and lake for their winter's food supply. The settlement prospered, but within two years it was scourged by smallpox and hardly a family escaped harm. Discouraged, a number of these left sought new homes elsewhere, some going across the line to the United States. Those who remained courageously set to work. New enterprises were launched and soon there was municipal government, a lake steamer, a newspaper, a sawmill, schools and churches and roads. Each year brought hordes of fresh immigrants, who were housed, fed, cared for and helped to make a start by the original settlers.

The Icelandic settlement at Gimli has now spread north to Riverton and west to Arbog, covering an area of approximately 250 square miles. An excellent example has been established at Arbog, and a prosperous dairy-farming district is quickly springing up in that neighborhood.

From Gimli have come some of the most prominent Icelandic people of the west, including Vilhjalmur Stefansson, the Arctic explorer, whose birthplace is 12 miles north of the town. From this modest settlement the Icelanders have spread to all parts of the prairie provinces and British Columbia.

Some of the prosperous farm communities opened by Icelandic pioneers are: The Argyle district, 140 miles west of Winnipeg, founded in 1871. It is entirely a wheat-farming region and is one of the most prosperous in Western Canada. Many of the homes

The simple, sure  
way to keep that  
schoolgirl  
complexion

Youthful complexions are becoming the rule—even in middle life and later years  
For millions now follow a simple rule—a method you, too, may easily employ.

## Do this at night

Cleanse the skin regularly, authorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny

pores. Rinse—and repeat the washing. Then rise again. Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

## The simple, correct way

You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare

palm and olive oils—famous for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive.

All dealers carry Palmolive Soap. Try it for just one week. See how it does improve your skin. Note well the name and wrapper. Palmolive is never sold unwrapped.

Costs so little that you may enjoy it for the bath also.

Made in Canada

Volume and efficiency produce 25c quality for 10c

Winnipeg Toronto Montreal

Palm and olive oils—nothing else—give Nature's green color to Palmolive Soap.

## SUNDAY SCHOOL LESSON

AUGUST 17

## JESUS CLEANSSES THE TEMPLE

Golden Text: My house shall be called a house of prayer. Matthew 21:13.  
Lesson: John 2:12-22.  
Devotional Reading: Psalm 15.

The Text Explained and Illumined I. The Desecrated Temple, verses 12, 14. It was "The Passover of the Jews," for thus John refers to the festival which Jesus went up to Jerusalem to attend. The preparation up is usually used in speaking of an approach to Jerusalem, for it is two thousand paces beyond the level. Jesus found the temple degenerate by the selling of oxen and sheep and doves for sacrifice (Lev. 1:2), and the charging of money into the temple in which the temple tax must be paid. These transactions necessary (but see Light from Sacred Texts) were not in the original plan of the temple area. It was the Court of the Gentiles which was used as a market place, the only court into which Gentiles could enter.

II. Righteous Indignation of Jesus, verses 15-17. In righteous wrath Jesus made a whip of cords and drove out the animals; next he overturned the tables of the money-changers and scattered the money; and finally he ordered those who sold doves to remove them. "Think you it was only the pleasure of righteous anger in his eye that sent them scurrying?" I tell you that behind that little wrath were miseries of men, made strong by many years of labor, and a spirit that never once knew fear, not even in the presence of the cross (Bruce Barker). "Be strong!"

Say not the days are evil—who's to blame? The cross is evil—who's to blame? And fold the hands and acquiesce—O shame!

Stand up, speak out, and bravely, in God's name.

Be strong! It matters not how intrenched the wrong.

How hard the battle goes, the day how long. Faint not, fight on! Tomorrow comes the song.

Be strong! (Metzger D. Barker). For So's Feet—Minard's Liniment

IF TROUBLED WITH  
DIARRHOEA  
You Should UseIt Will Give You  
PROMPT RELIEF

This valuable preparation has been on the market for the past 30 years, and holds a reputation, second to none, for the relief of all bowel complaints whether of children or adults. Manufactured only by The T. M. Barr Co. Limited, Toronto, Ont.

## Transmission Of Sound

As the most effective means of making a tremendous noise, Sir Oliver Lodge suggested the explosion at a considerable height of a deflating gas such as a mixture of hydrogen and oxygen, in a balloon. In the late tests to show how far the sound of explosions can be transmitted, much of the energy, it is pointed out, must have been wasted in the air, instead of producing air vibrations.

Recognized as a leading scientific for the destruction of worms, Mother Gray's Worm Expeller has proved a boon to suffering children everywhere. It seldom fails.

## World Largest Libraries

The three largest libraries in the world are the British Museum Library, with 4,600,000 volumes; the Bibliothèque Nationale at Paris, with 3,000,000; and the Congressional Library at Washington with 2,500,000.

Ming's Liniment for Rheumatism

## Pulling Power Of Magnet

Seven Men Lifted Clear of Ground in Demonstration

To demonstrate the pulling power of an industrial type of electromagnet used for separating metallic substances from other materials, seven men, totalling 1,150 pounds in weight, were suspended from it and lifted clear of the ground. The magnet was hoisted in a rope along about eight feet from the floor and a metal bar was placed in contact with it. When a current of 230 volts was applied, six men grasped the bar and were lifted clear of the ground. A seventh man, into whose shoes had been placed this metal plate, was hoisted up and held "hanging downward"—Popular Mechanics.

There are 720,285 miles of railways in the world.

ASTHMATOR GUARANTEED  
TO RELIEVE ASTHMA

"I have arranged with all druggists here, as well as in all other towns of Canada, that every sufferer from Asthma, Hay Fever, Bronchitis, Asthma or difficult breathing in this city can try my treatment entirely at my risk." Dr. R. Schiffmann asthmator. He says: "Buy a package of my Asthmator, try it, and if it does not afford you immediate relief, or if you do not find it the best remedy you have ever used, take it back to your druggist and he will return your money, cheerfully and without any question whatever. After accepting the grateful relief it has afforded in hundreds of cases which had been considered incurable, and which had been given up in despair, I know what it will do. I am so sure that it will do it for others that I am not afraid to guarantee it will relieve instantaneously. Druggists, anywhere, handling Asthmator will return your money if you say 'No. You are to be able good and under this positive guarantee absolutely no risk in run in buying.' Persons preferring to try it before buying will be sent a free sample.

### Stony Plain and District.

Another big shoot is billed for the Comet Butte Wednesday next Aug. 20. Members are asked to bring their wives.

Barley cutting will commence the latter part of the week in this district.

There are two vacancies at present at Glory Hills school. The Board advertised, and received 61 applications in reply. It is required of the Principal that he have a first-class certificate, as it is the Board's intention to have up to Grade XII taught the coming session.

There was a very enjoyable dance Saturday night at Mr. Paul Kulak's, at Edmonton Beach, with a large party present.

A rather small crowd attended the Friday night dance at Tecumseh schoolhouse, so another will be given in a short time.

Mrs. R. Smith has her father and mother, Mr. and Mrs. Shaw, from Australia, visiting with her at her home south of Spruce Grove.

To date, the hotel at the Grove has not obtained a license to sell beer.

Tires and tubes vulcanized and repaired at Stony Plain Garage. 4109

### Exhibitors at the Fair.

The Fair this week attracted quite a number of stock exhibits from outside points. Seven carloads came in Sunday from points on the C. N. east of Edmonton. These were:

A. O. Thurbon, Gilby, with Red Polled cattle.

W. Thomson, Lavo, with Shorthorns.

Messrs. Kennedy, Calgary, Ayrshires.

Geo. Bevington, Winterburn, Holsteins.

Wm. Gibb, Killam, Aberdeen Angus.

W. Alsieger, Vauxhall - Herefords, Tamworths and Suffolk sheep.

### Railway Time Table.

Grand Trunk Railway.  
Going east, 2.40 p.m.—Sunday, Mon., Wed., Thurs., Friday, and Saturday.

5.43 a.m., every morning, stops on flag only.

Going west, 1.30 p.m.—Prinos Report Express, every day except Sunday.  
2.17 a.m., every day, Vancouver Express; stops on flag only.

### Sporting Notes.

The Regulars and Scrubs were out again on the evening of the 8th, at the local grounds. The juveniles' new pitcher Conrad Fahr was in the box for a short time and was replaced by Henry Treit. The Regulars' pitcher Mr. Herman, who had been resting in the box for a few days, was in fine form, had good support from his team-mates, and of course they won, 8 runs to 2 in a 3-innings contest.

Altho Stony's ball club finishes its scheduled games at home and away on the 20th and 24th of this month, there are some half-dozen postponed games still to be played, and the secretary is now arranging the dates for these.

Eric Heichen took his ball players to the Grove on Sunday last, and played Albert Ries' team. Henry Treit and Eric Heichen pitched for the Scrubs, and held the opposition players down pretty good. Several of Stony's Regulars were noticed on the Grove's team; but, if these were any help to the Groves, the score don't show it, as the Scrubs won by 12 to 9. Scrubs: Heichen, Ph. Al, J. Miller, H. Treit, Henry and Karl Enders; Philip, Jac and John Ulmer.

Manager Heichen is arranging to take his team up to Evansburg, to give the ball players there a game.

A very interesting game of football was played Monday night on the Fair Grounds—the idea being to demonstrate that the ball players were better footballers than the kickers themselves. The baseballers didn't lack for material, as shortly after play began they didn't have any more than fourteen players working on their team, including the Big Chief and Beefsteak Charlie, necessitating Referee Founds stopping the game several times and running the baseballers' team thru the eliminator. The play in general was as good as has been seen locally this season. The score was 2 all, making it fairly evident we have evolved the dual-purpose athlete—the chap who can play football just as good as he can play baseball. Mike was there!

The visiting Cattlemen played a game with Stony Plain Football Club's team Tuesday night, the score being 1 to 1 after a very good game.

Stony's basketball players went out to Edmonton Beach Saturday evening and played a game with the girls there. Stony's girls played to lack combination, plays, and the other side piled up a fairly good score at the end of play. Ward Steckle was referee.

### The Baseball League.

### Here and There

Glass tubes filled with water are used as incubators for trout eggs at the Ontario Government Hatcheries.

Designed to prevent mildew, a Californian has invented a device which sprays wet or dry sulphur over grape vines.

More than 36 tons of food are required daily to feed hogs on a California ranch and it is distributed by means of an electric railway using side dump cars.

The light producing apparatus of the glow worm and firefly is said to be the most efficient in the world. The glow worm light is eighty times more efficient than a tungsten lamp.

Construction of a million and a half dollar factory building has commenced in Cornwall, Ont., which, when completed, will give employment to 500 hands. Artificial silk will be manufactured from pulpwood.

Crossing from Quebec to Quebec in 5 days 19 hours, the Canadian Pacific S.S. Empress of France created a new record for the trans-Atlantic voyage. Her average speed on the record run was 20.155 knots.

Montreal officers of the Dominion Express Company state that the trans-Atlantic shipping this year has been much heavier than heretofore. The Ontario crop ripened quickly, but was easily destroyed.

Alberta Government wolf-hunters will this season again penetrate the barren land and wage war on the timber-wolves which prey on the caribou herds. Last season the hunters killed off several hundred of the predators in the country north-east of Great Slave Lake.

Beginning in the Autumn, German express trains will be equipped with combination radio and wireless telephones, enabling the sending of wireless messages and the giving of radio concerts while the train is travelling at a high rate of speed.

A world's record for his senior two-year old Holstein, Priscilla Heifer, Williamburg Pontiac, is claimed by Dr. M. W. Locke, Williamsburg, Ont., as a result of a day test showing production of 5,768.5 pounds of milk and 118.82 lbs. butter fat, equivalent to 143.4 lbs. of butter.

The official Railway Guide, in commenting on the Air service which connects with the Canadian Pacific Railway at Regina, says: "so far as we are aware this is the first instance on this continent where interchange of passenger traffic between railways and airplanes has been established."

In an address to the Associated Merchants and Manufacturers of the World at Wembley, July 17th, E. W. Beatty, president of the Canadian Pacific Railway, stated that the amounts spent on colonization by the Canadian Pacific Railway and the Canadian Government from 1881 to 1907 totalled, respectively \$47,000,000 and \$35,000,000.

During the last four years the Canadian Pacific Railway has had 10,000 more board harvesters. Last year this company inaugurated the lunch-counter car, which afforded a facility at all stations, unknown, and, although perhaps not as a direct result of this innovation over 30,000 men were fed in special trains over Canadian Pacific lines.

The unveiling of a monument to Tom Wilson, earliest guide in the Canadian Rockies featured the first day's meeting of the two hundred and six members of the Trail Riders of the Canadian Rockies at Yoho Camp. Mr. Wilson, who was present at the ceremony and, now sixty-five years of age, resided at Enderby, B.C., discovered Lake Louise and the Yoho in 1882.

A. D. MacTier, vice-president of the Canadian Pacific eastern lines, who awarded to the MacLean team the First Aid Challenge Cup, which they won in competition with teams from North Bay, Toronto, Windsor Station and Huron, stated that since the Canadian Pacific Council of the St. John Ambulance Association in 1907, over twenty thousand employees of the Company have received instruction in First Aid. The last annual report of the St. John Ambulance Association referred to the Canadian Pacific as the premier railway.
